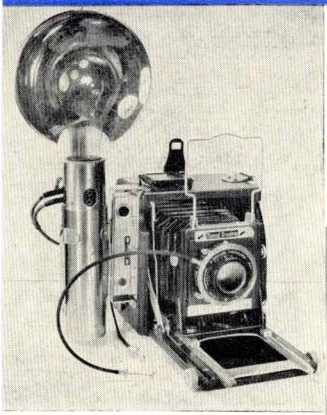
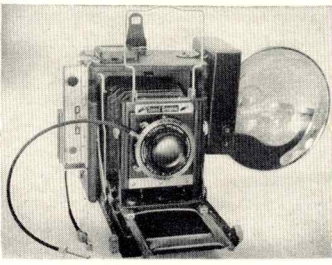
GRAFLEX *Prize Winning* CAMERAS

MINIATURE 2¼ x 3¼ *SPEED GRAPHIC*

START PICTURE-TAKING AT SUNDOWN



There are various makes and styles of photoflash synchronizers that are available and usable with the 2¼x3¼ Speed Graphic. Two are illustrated at left and below.

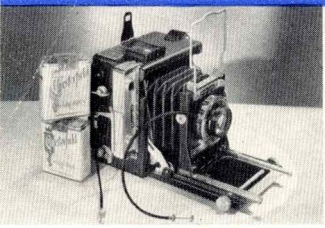


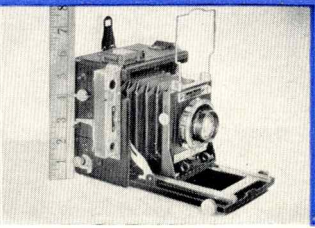
THE 2¼ x 3¼ Speed Graphic inaugurates a new era in flash photography, ushering in as it does a materially extended range of shutter speeds at which flash shots can be made. In fact, in this camera all focal plane shutter speeds from 1/60 up may be so synchronized with long-duration flash lamps like the No. 2 or equivalent.

Contact points are built in the focal plane shutter, a handy contact socket into the back of the camera. Thus, all one needs to utilize the focal plane shutter as a synchronizing means is the accessory connecting cord and any suitable battery case with reflector.

Here, then, is the trail to a whole new chapter of photography . . . the enjoyment of fast-action flash photography at night or indoors . . . in any kind of weather.

NEW COMPACTNESS





MINIATURE 2¼ x 3¼

SPEED GRAPHIC

Here is REAL news for camera fans—a *brand new* miniature 2¼ x 3¼ Speed Graphic that is 36% *smaller* than any Speed Graphic camera ever built! It's *really* small . . . hardly as tall as two packs of cigarettes . . . only 5½″ high, 4⅞″ wide, 3½″ deep! Yet, it embraces all the features of the larger Speed Graphics . . . *plus* these new and advanced ones: ★ built-in focal plane shutter flash synchronization ★ all-metal bed ★ helical racks and pinions ★ precision Vernier footage scales ★ dual focusing controls ★ interchangeable molded lensboards ★ satin chrome trim ★ accessory internally coupled range finder.

This new camera, with its built-in focal plane shutter flash synchronization, will let you "shoot" pictures you never before dared try—for now, if the action is fast, you can use the camera's *top* shutter speeds for flash "shots"! It is a "natural" for 1-to-1 copying or scenics, table top or fast action shots, pastoral or pictorial work—in fact, for all-around finer "shooting" night or day. Small in size, *big* in performance—a true Speed Graphic like the press photographers use.

Y...NEW FEATURES!

THESE RECOGNIZED *SPEED GRAPHIC* FEATURES

- **Interchangeable Lenses** and molded lensboards permit the use of Speed and Telephoto lenses.
- **Two View Finders** permit instant accurate composition.
- **Generous Bellows Extension** permits "1-to-1" copying with regularly listed short focal length lenses. Bellows capacity: 9 inches.
- **Drop Bed** permits use of wide angle lenses.
- **Ground Glass Focusing.** Graflex users, accustomed to ground glass focusing, will enjoy using the rear ground glass focusing screen.
- **Broad Exposure Range.** The Focal Plane Shutter, in combination with a between-the-lens shutter, affords controlled exposures ranging from one sec. to 1/1000.
- **Rising-and-Falling Front** permits "correction" for perspective or distortion in unusual subjects.
- **Photo-Flash Synchronizing** is easy with either the Focal Plane Shutter or the between-the-lens shutter.
- **A Choice of "Backs."** The new 2¼x3¼ Speed Graphic is available with either "Graflex Back" or "Graphic Back."

—PLUS THESE *NEW* AND ADVANCED ONES

- **Built-In Focal Plane Shutter Flash Synchronization** broadens the range of the camera in "covering" sports and action events indoors or at night.
- **All-Metal Bed** gives added strength to the front and extra protection when the unit is closed for carrying.
- **Helical Racks and Pinions** afford smooth, frictionless focusing action.
- **Dual Controls** provide both right-handed and left-handed focusing—enabling use of the camera in the way that is easiest and most natural.
- **Precision Vernier Footage Scales** are made up at the factory for each individual combination of camera and lens—a safeguard for better pictures.
- **Satin Chrome Trim** gives smartness and beauty of appearance commensurate with the camera's unequalled versatility and efficiency.
- **Internally Coupled Range Finder,** an accessory especially developed for this camera, has all moving parts enclosed when installed into the camera.
